TRP2 COMBAT

OTO - TRP2 COMBAT

OTO TRP2 Combat is the new Oto Melara remote-operated electric-powered tracked Unmanned Ground Vehicle especially designed to support soldiers involved in asymmetric war scenario.

OTO TRP2 combat is able to climb stairs, overcome rocks obstacle and operate in all-terrain and -weather missions.

OTO TRP2 Combat is heavy rugged and can be rapidly split in three light-weight independent parts in order to be easily packed on back-sacks and transported on the operative theatre and instantly ready for operation.

OTO TRP2 Combat runs faster than a running soldier acting as a perfect cover and advanced treats detector and life protector.

OTO TRP2 Combat is equipped with:

- Advanced system for target aiming and ranging;
- Redounded firing circuit;
- Light machine gun MINIMI 5,56 mm;
- Grenade launcher (40 mm) – Revolver 6 shots;
- Smoke grenade launchers;

OTO TRP 2 Combat is easy to operate by a single soldier using an hand-portable Control Unit integrated with special night and day display and specific joystick. Up to 8 colour cameras, including night vision, PTZ and stabilization option give the operator an Outstanding Situational Awareness.
